New Technique to detect breast cancer

3178. SHRI GHULAM NABIAZAD: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether Government are aware that a new technique has been discovered in London which detects breast cancer at a much earlier stage which will facilitate early treatment;

(b) if so, whether Government have given publicity to this technique and thus save women from such a deadly disease; and

(c) if so, the broad features thereof ?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRI A. RAJA):

(a) Yes, Sir.

(b) and (c) Three new techniques have been reported from i-andon which help in early detection of breast cancer. These are :—

(i) Computer aided detection in mammography.

(ii) MRI breast scan.

(iii) Imaging with To-99 humanised anti-PEM monoclonal anti-body, HMFGI.

No publicity has been given about these techniques since the same are not yet considered to be established diagnostic techniques and are also not available at most of cancer hospitals. However, Self Breast Examination (SBE) is being promoted across the country for early detection of breast cancer as a cost effective method.
